

DMT PRODUCT SERIES:	PVC SHRINK FILM
MODEL:	DMT-DM05PVC
DESCRIPTION:	PVC SHRINK FILM

INTRODUCTION

DM05PVC film is a high performance Polyvinyl Chloride (PCV) thermal shrinkage film. It's made by blown film lines and has excellent shrinkage rate, heat & impact resistance, suitable for surface protection for products during manufacturing and transportation processes.

TECHNICAL SPECIFICATIONS

Product Name	PVC Shrink Film
Dimensions	0.05MM*1,240MM*500M
Material	Polyvinyl Chloride
Color	Transparent (Dark Blue Background)
Carrier Material	PVC
Release Force	N/A
Shrinkage Temperature	60°C
Shrinkage Rate	MD 25% / TD 45%
Tensile Strength	100%
Jumbo Roll Width	1,240±10mm
Thickness	0.05±0.008mm
Jumbo Roll Length	500±5m
Inner Core Diameter	3 inch/76.8mm
Transmittance	>90%
Core	PE, 1,300mm
Warranty	1 Year

PRODUCT FEATURES

- >> PVC rolling product, relatively thin, even thickness, good flatten property
- >> High transparency, small water-wave, less crystal points
- >> High resistant value, good static performance
- >> Good initial tack, level can be customized
